

8. Consider the <https://mtdcrrs.maharashtratourism.gov.in> using JMeter and do as directed:
- a. Configure the Performance Test environment for the registration and login page of the site.
  - b. Implement following assertions and retrieve the results:
    - i. Response assertion
    - ii. Listener: Assertion results
    - iii. Duration assertion
    - iv. Size assertion
    - v. HTML assertion
    - vi. XML assertion
  - c. Add listeners
    - i. View results in table
    - ii. View results in tree
    - iii. Aggregate report
    - iv. Graph results
    - v. Summary report
    - vi. Simple data writer

**Enhance your learning:**

- ✓ What is a Post-Deployment Test?
- ✓ List to parameters of Database Testing.
- ✓ Describe preparation of Database Test Plan in JMeter.

**Solution Must Contain:** Screenshots of test setup, test assertions, test listeners, test execution and test results with analysis and description.
